

Applied Kinesiology Techniques in Visceral Osteopathy

Dr. med. Hans Garten, Munich

Diplomate International Board of Applied Kinesiology (DIBAK)

Diplomate American Chiropractic Neurology Board (DACNB)

Diplomate in Osteopathy (DAAO)

Dr. Hans Garten has been teaching AK almost 20 years and is the author of three reference books in Applied Kinesiology.

28th - 30th October 2011 in Solothurn

This course will demonstrate the application of AK techniques in visceral osteopathy:

- ✓ Basic visceral osteopathy: mobility, motility, fixation, adhesion, ptosis
- ✓ Use of the AK concepts of TL and Challenge for the viscera
- ✓ Pathogenesis of the toxic bowel syndrome and visceroptosis
- ✓ Analysis of abdominal and postural forms relative to vitality and atrophy, important findings in enteropathy and visceroptosis
- ✓ Treatment - protocols for disturbances of the:
 - Thoracic organs, diaphragm, hiatal hernia
 - Liver, gall bladder, sphincters
 - Stomach
 - Small intestine
 - Colon
 - Urogenital apparatus
- ✓ Visceral/visceroparietal disturbance chains (vertebral/craniosacral lesions)

Why attend?

- Learn new techniques
- Improve your assessment, treatment and outcomes
- Develop a sequential diagnosis protocol, easily applied in practice
- Renew or expand your AK skills and take them to the NEXT LEVEL!
- Workshop in small groups is guaranteed

Who should attend?

- Attendees should be familiar with manual muscle testing and basic AK techniques
- AK – practitioners with basic knowledge
 - renew, expand and deepen skills
- Experienced AK-practitioners
 - add this valuable content to your established paradigm and take it to the next level
 - complete your curriculum towards AK- diplomacy (DIBAK)
